

Shade Structure Solutions
The Creative Shade Experts

*We believe that
today's innovation is
tomorrow's tradition*

About Us

FIOBCO was founded in 1993 in the Emirate of Dubai, United Arab Emirates and has been instrumental in improving the quality of shade structure solutions across the GCC region. As the first tensile structure provider in the UAE to build its own manufacturing facility, we have complete expertise in designing, manufacturing and installation of shade structures in order to meet the ever evolving needs of the region's architectural progression.

We are proud to be associated with well-known contractors who we consider as not just our clients, but our partners. In our endeavor to provide a wide variety of quality products, we have built our partnerships with the world's most innovative companies in the tensile fabric industry from Germany, France and Australia.

Our highly professional and well-trained design, engineering, manufacturing, installation and management teams ensure FIOBCO delivers the best quality solutions every time. At FIOBCO, we are committed to develop innovations inspired by traditio.

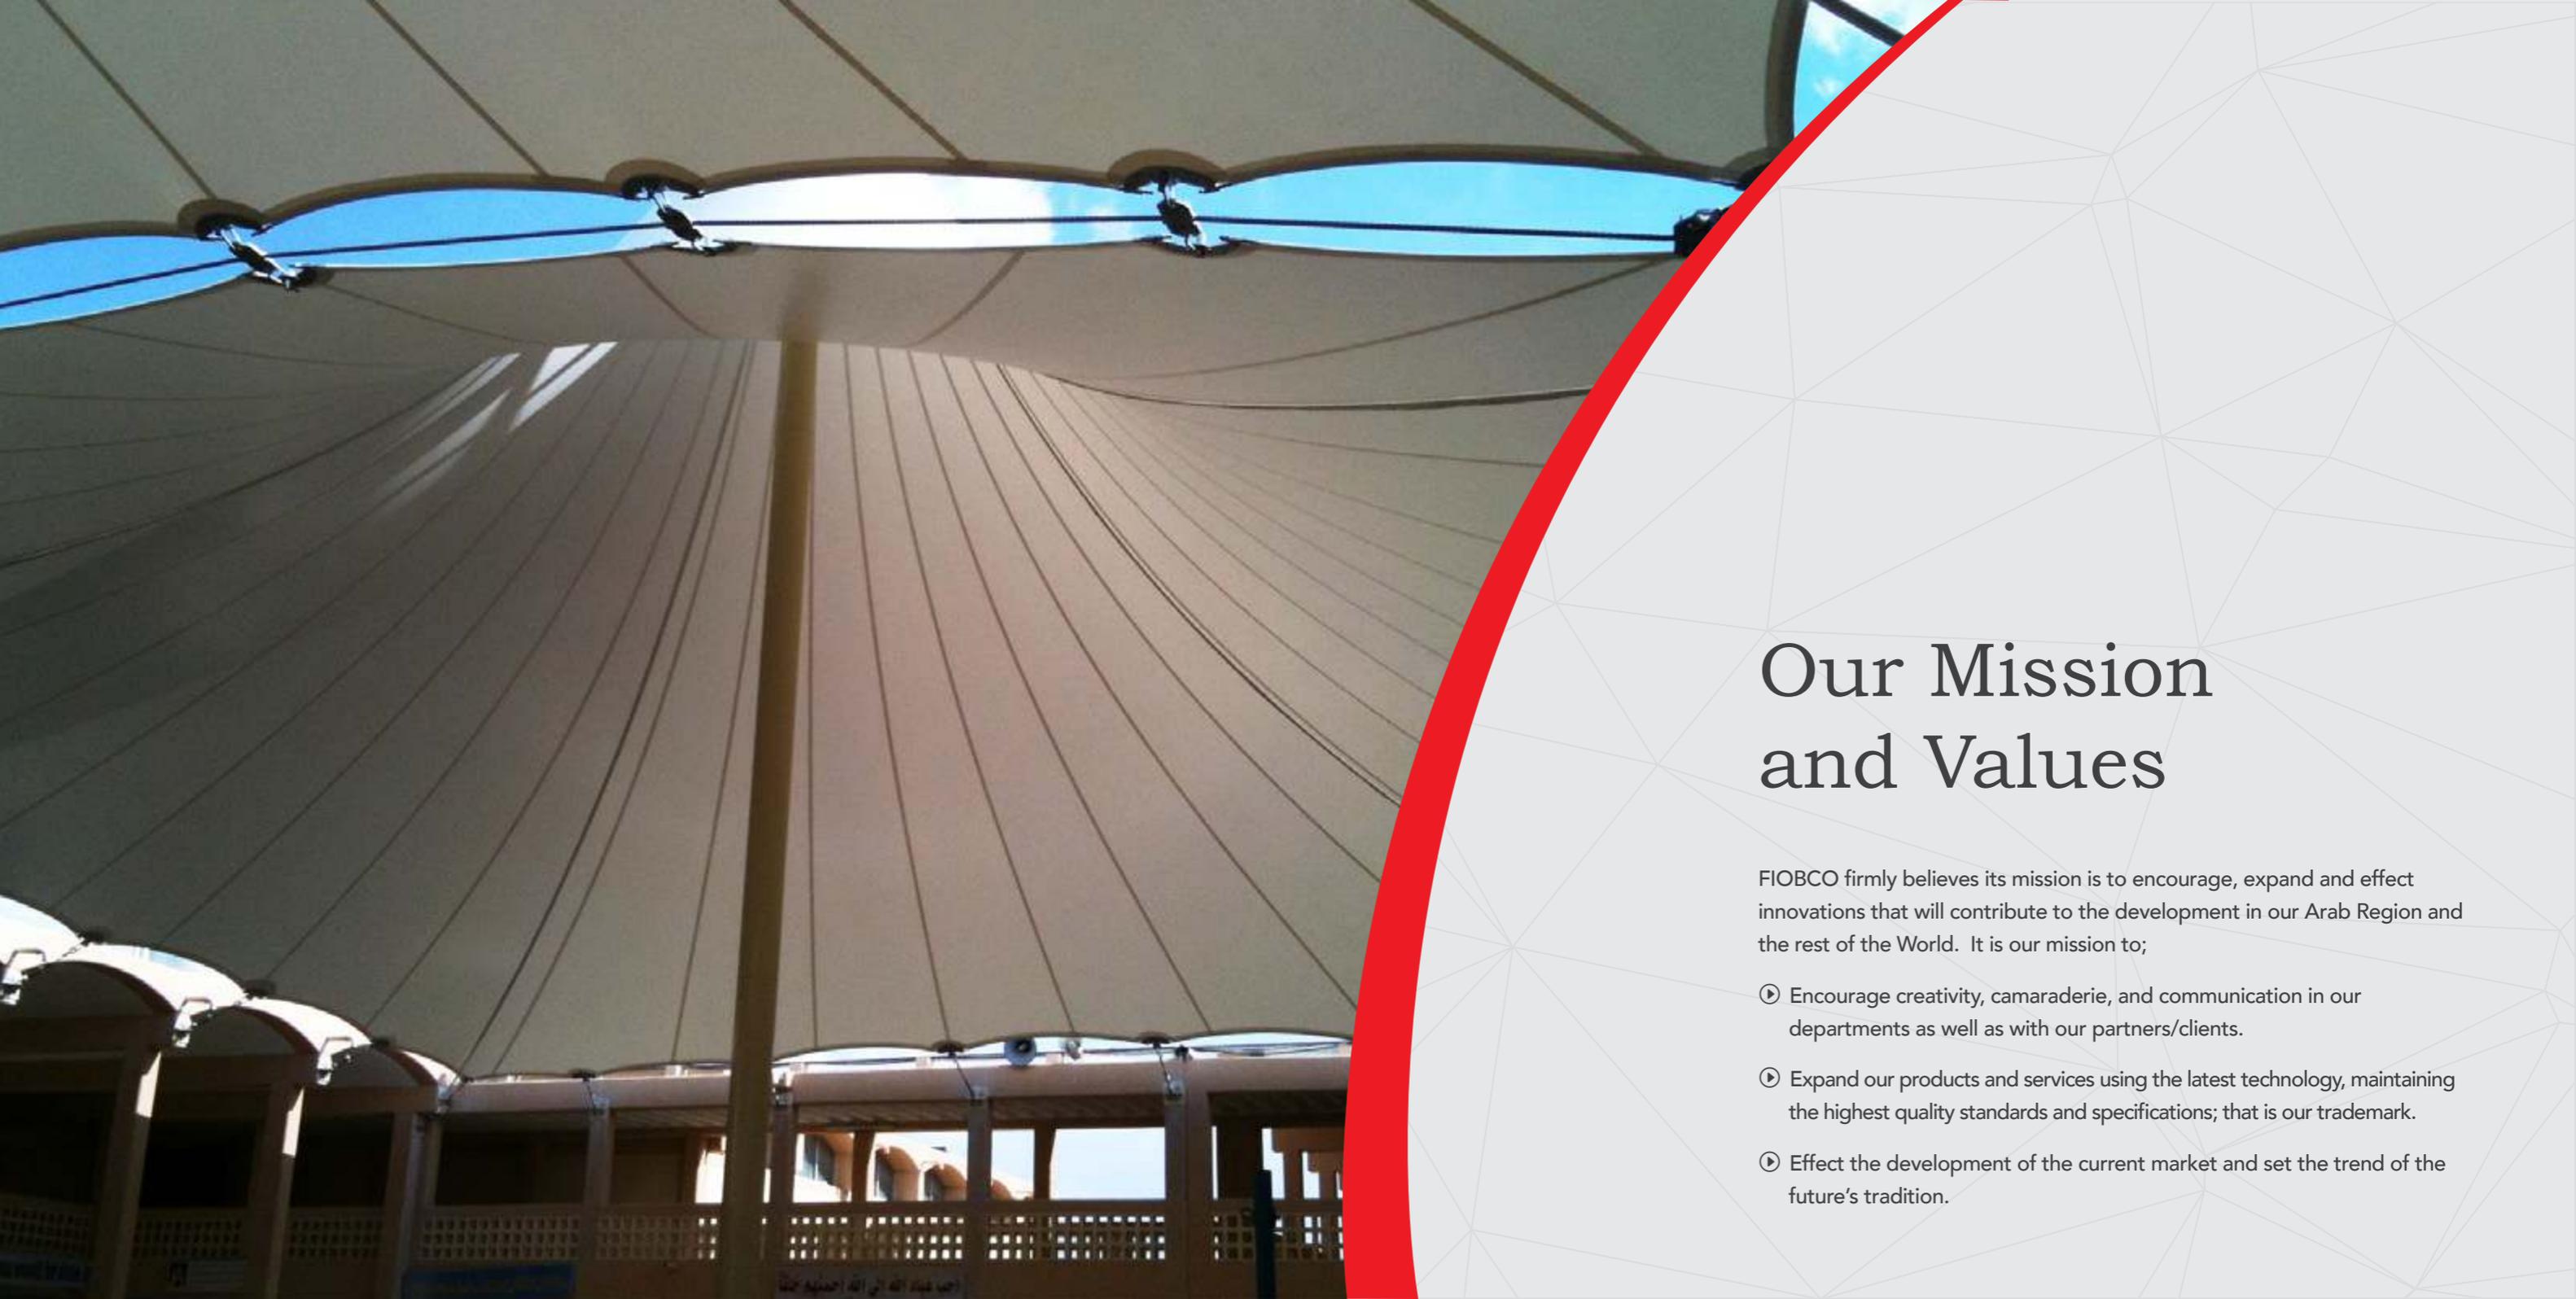

Since 1993 we have been the creative shade experts specializing in tensile shade structures. Our shade structures are bespoke, versatile, attractive and durable, making them the perfect solution for outside areas requiring man-made shade.

Our Vision

FIOBCO endeavors to provide the highest quality tensile shade structure solutions in the region. We deliver new concepts and innovations that set the trend and sculpt the country's skyline.

We pride ourselves on being the first company in the UAE to cover all aspects of the design, fabrication, tailoring, erection and maintenance, all under one roof. This allows us to have complete control over the solutions we deliver as well as the creative freedom to explore different designs and concepts.

From car park shades to grandstand shades, awnings and canopies, resort shades and all types of tensile structures, Fiofco can guarantee the best quality product every time.

Our Mission and Values

FIOBCO firmly believes its mission is to encourage, expand and effect innovations that will contribute to the development in our Arab Region and the rest of the World. It is our mission to;

- ▶ Encourage creativity, camaraderie, and communication in our departments as well as with our partners/clients.
- ▶ Expand our products and services using the latest technology, maintaining the highest quality standards and specifications; that is our trademark.
- ▶ Effect the development of the current market and set the trend of the future's tradition.

Why work with us?

As the first tensile structure provider in the UAE to build its own manufacturing factory, we have complete in-house expertise in designing, manufacturing, installation and maintenance in order to meet the ever evolving needs of the regions architectural progression.

As a one-stop shop we have control over each step of the designing, production and installation; this allows us to implement meticulous attention to detail during every step of a project's process.

Our International warranties are a testament to the extremely high-quality of our products.

We are one of only a few companies that provide PTFE tensile structures.

As experts in the industry, we are able to offer diversified solutions to suit the needs of each customer.

The FIOBCO 6 Step Cycle

At FIOBCO we have control over every part of a project, from the initial enquiry to the completed installation. This allows us to implement meticulous attention to detail during every step of a project's process and request approval from clients to ensure that they are fully satisfied with the progress. We have simplified the intricate project process into a 6 Step Cycle.

Enquiry

An enquiry is submitted detailing the clients requirements.

Estimate

Our team develops a solution and provides an estimate of costs and project timelines.

Design

Once the estimate has been approved, our talented designers begin the design process and create several design drawings.

Fabrication

When everyone has agreed on the final designs, the fabrication of steel, tensile membrane and accessories begin on site in our factory

Installation

On completion of fabrication, our team begins the installation of the shading.

Maintenance

Our team are available for any ongoing maintenance required.

Fabric Types

HDPE

(High Density Polyethylene) mesh is a heavy duty knitted shade cloth designed for tensile membrane shade structures and shade sails. Shade mesh comes in a variety of styles, colours and shade factors.

PVC

(polyvinyl chloride) is a common, strong but lightweight plastic used in construction. It is a cost-effective alternative to traditional roofing systems and can be produced in a multitude of colours. When produced in bright white, this flexible fabric membrane reduces radiant heat gain, keeping interior temperatures cooler during warmer weather conditions.

PTFE

(polytetrafluoroethylene) is a Teflon-coated woven fiberglass membrane that is extremely durable and tolerant of even the most extreme weather elements.

professional care.*

Maintenance

A well installed canopy or shade is only the beginning. It is also vitally important to maintain your shade structure to ensure it lasts a long time. FIOBCO's maintenance team can provide cleaning, repair, refurbishment and general maintenance work at key stages of the life of your shade.

Maintenance and cleaning frequency depends on a number of factors, such as location of installation and surrounding environment (trees, A/C ducts and exposure to sun and dust etc.). Generally, we recommend that your shade should be cleaned annually, however a higher frequency of maintenance is suggested due to the severity of the climate in the Middle East.

FAQs

HOW LONG WOULD IT TAKE TO INSTALL A SHADE?

All our shades are manufactured according to specific requirements and a timeline will be provided along with estimate at the beginning of the project. There are a number of factors which would influence the timeline of a project such as the design and size of shade.

WHAT ARE THE DETAILS OF THE INTERNATIONAL WARRANTY?

We can provide international warranties of up to 15 years on all structures and the maintenance will ensure that it lasts even longer than that.

DO THE SHADES OFFER PROTECTION FROM UV RAYS?

Yes, they do. That's what makes them great for swimming pools and outdoor shading solutions as they offer protection from the sun's UV rays.

ARE THE SHADES WATERPROOF?

Yes, we can provide waterproof solutions.

HOW OFTEN WILL I NEED TO CLEAN THE SHADES?

You will not need to clean the shades as the fabric membranes have self cleaning formulae which prevents dust and sand from sticking to the surface.

DO THE FABRICS COME IN DIFFERENT COLOURS?

PVC and HDPE comes in all colours and PTFE comes in beige and off-white.
